## SUMMARY

I'm an Enthusiastic Learner who enjoys dabbling in various areas of Software Engineering. I'm inspired to explore and develop solutions to some intriguing real-world problems. Looking forward to contributing to the advancement of society.

---

## EXPERIENCE

### SOFTWARE DEVELOPER INTERN

Fusion Technologies

April 2021 - June 2021, Remote

- Created a Video Conferencing Application with Node.js and Python.
- Developed and tested various protocols for sending chat messages more efficiently.
- Reconstructed an Image Hash Python Library using simple algorithms that met our needs.
- Configured the server and efficiently deployed multiple web applications.

### SOFTWARE ENGINEER - INTERN

Euprime Consulting Pvt. Ltd.

May 2021 - June 2021, Remote

- Developed a business-to-business (B2B) application to connect clients with the company.
- Created the backend of the application with Django.
- Razorpay Payment Gateway integration to handle payments and improve user experience.
- Used AWS Elastic Beanstalk to deploy the application and Amazon RDS for the database.

---

## PROJECTS

### Recruitment Website

Career Development Cell, IIT Dharwad • July 2021 - January 2022

- Leading a team of 10 to create web applications that aid in the recruitment process.
- Handling multiple user profiles and efficiently connecting everyone.
- Developing the application using Django and React.

### Election Website

OSS, IIT Dharwad • August 2020 - November 2020

- Developed the frontend for an application for organising IIT Dharwad's All Student Body Elections.
- A four-person team created the app from the ground up using React.js and other services such as Google Oauth2.0.
- Casted 600 votes in total on the day of elections.
- Currently live and can be seen at <https://election.iitdh.ac.in/>.

---
